

# Finish the Image

The inspiration for the toys that hang over a baby's crib, Alexander Calder is known for his "mobile" sculptures. His artwork *The Star* features red, blue, and black shapes, and a yellow star, connected with wires to keep everything balanced. Here you can draw whatever shapes or objects on the mobile that you want! If you add something heavy on one side, how will you balance it on the other?

Alexander Calder, *The Star*, 1960, polychrome sheet metal and steel wire. Collection of the UK Art Museum, bequest of George and Susan Proskauer, 1992.17.55.
